

TMOB-HUB

Transportation and Mobility Research

TMOB-HUB ANNUAL SEMINAR

TMOB-HUB is a platform developed as a School of Engineering level, that associates the competences of researchers, R&D units, and interface institutes from the School of Engineering of the University of Minho.

TMOB-HUB covers the five main modes of transport, including Rail, Metro, Road, Aerospace, Sea, and River, as well as their interaction. It also strongly cooperates with the main national transportation actors and multiple international partners.
